

## How Long Does Skin Needling Take?

Microneedling, also known as skin needling which is often used to refer to it isn't a long-term procedure.

This is due to the innovative invention of auto skin Needling pen devices that help you save time and assist in relieving your discomfort. If you choose to apply a numbing cream for the treatment and then wait for it to work is the process that is the most time-consuming.

Another important step is to take the time to create an environment that is safe for the skin needling procedure.

## How Long Does Skin Needling take to Produce Results?

Skin Needling results appear quite quickly.

We've got the complete description of the healing process for skin [here](#) We'll then detail the moment you'll notice that post- Skin Needling glow.

The moment you receive the treatment you will notice your skin to be red and irritated however, it will be plump and smooth because of all of the healthy cells and platelets that are rushing onto the skin.

From the time you begin your treatment to 14 days after treatment, your skin sends all its healing cells and protective ones onto the skin's surface. While they're busy repairing the microchannels the microneedles made and generating collagen, the cells that make collagen have been activated to overdrive.

From days 7 to 14 and beyond, you'll feel the full benefit from the Skin Needling glowing. This is the right period to allow the skin to heal completely and to send the extra collagen into the outer layer.

The application of active ingredients and retinol just following Skin Needling is the way everyone thinks it will give the skin a deeper-lasting, more long-lasting shine.

In actuality, applying the actives and retinol too late in the healing process can cause damage to the skin and can hinder the natural healing capabilities of the skin.

Skin Needling is most effective when you utilize hyaluronic acid exclusively during the healing phase. This is an ingredient that your body naturally produces.

If you take an active ingredient in a hurry the body must be patient and stop healing to process the ingredient. We do not want to disrupt the healing process. When you use hyaluronic acid serums your body will appreciate the additional water intake and can keep focusing on the production of collagen.

## **Are Skin Needling or Microneedling Results Permanent?**

Skin Needling is a great benefit It helps to minimize the appearance of wrinkles and fine lines it also reduces sun damage, helps reduce stretch marks and scars, and improves tone as well as texture while also improving the overall health of your skin.

Like many cosmetic treatments, the results will fade over time because the skin itself is growing, living tissue. To keep your results in check regular Skin Needling treatments are needed to ensure you don't lose the gorgeous skin improvements you've achieved.

Pregnancy, for instance, could contribute to the growth of melasma hyperpigmentation, stretch marks, and more. The medication we take can alter our skin's texture as well as tone and type.

Sun damage is likely to recur if we're not consistent with our sun protection. Additionally, other factors like hormonal imbalance, diet, and bacteria may cause acne scarring and acne. There is a myriad of factors in play that could alter the appearance of our skin, in addition to the process of cell renewal.

Skin Needling each 4 to 6 weeks will increase the thickness and strengthen the dermis, which is the most underlying layer of skin. The epidermis which is the upper layer is smoothed and toned up.

Our Beauty Advisor suggests seven to eight treatments depending on your skin problems After this number of treatments, you're likely to notice a significant improvement.

Some results can be seen after fewer or even more treatments, but it all depends on the healing process of your skin and the extent to which you believe improvement for your specific skin problem to appear like.

## Let's Summarize How Long Does Skin Needling or Microneedling Take

The procedure takes about 30 minutes to prepare the area and treat the skin.

It's not long before you notice the positive effects of skin Needling treatment, however, it could take up to 7 to 8 sessions before you notice a change in your skin's condition.
